

Go Green Club By: Claire L.

In Go Green Club we really like to garden! We pick parsley, tomatoes, and peppers from the garden. We eat it and some students take it home. We just discovered we have basil in the garden! The Club is also making a dog sculpture out of recycled laminate. The laminate was collected from the teacher's workroom. Teachers use the lamination machine, and the Go Green Club collects the big scraps. Students in the club make the dog by painting the laminate, making the laminate look like fur, hole punching the laminate, and we tie it on the dog. The dog is made out of chicken wire. Mr. Fischer helped us to create the wire form for the dog. We are also making a bone out of Paper Mache. The Go Green Club is a great way to participate at school while practicing how to be green!
